Hi Mark, David Yogi and I were asked to assist with community engagement regarding the Gold King Mine Release in Colorado, we are in Farmington and we will be traveling to Oljato and Aneth for Chapter meetings so Im not able to help. We are participating in various meetings on Navajo Nation all this week.

Hi Secody, START is going back to the vent hole behind Annie's house to further investigate the extent of contamination. They will also go to the vent hole past Edison's house. The field work will happen on Thursday and Friday, August 13 and 14. I will be there only on Friday.

We will need to go through the gate near Edison's house and this is the first time we will be working at that site. Secody, could you call Edison to let him know we are coming and ask permission to go through their gate? Also ask him if he would like us to start there on Thursday morning, maybe 7:30 am or if he would prefer the afternoon. Do you think that it would be a good idea for John Plummer to join them on Thursday as a liason? If so, would that be appropriate under the TASC contract?

The work will be our standard gamma scanning and soil sampling with hand trowels and a hand auger. START will have one pick-up truck on Thursday and I will join them with my SUV on Friday. There won't be any other vehicles or equipment.
